

# VARENNE UCITS-VARENNE LONG SHORT A-EUR - LU2722194946

PERFORMANCE SCENARIOS AS OF 28 MARCH 2024

VARENNE LONG SHORT is a Sub-Fund of the Luxembourg based SICAV, Varenne UCITS.

Performance scenarios for each share class of the Sub-Fund are available in the Key Information Document (KID) of the share class and are updated on a monthly basis at [www.varennecapital.com](http://www.varennecapital.com). The scenarios are established in compliance with EU Regulation 1286/2014 (PRIIPS Regulation).

**What you will get from this product depends on future market performance.** Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions Markets could develop very differently in the future.

Recommended holding period: 5 years Investment: EUR 10 000			
Scenarios		If you exit after	
		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs Average return each year	EUR 3 840 -61,6%	EUR 3 877 -17,3%
Unfavourable scenario	What you might get back after costs Average return each year	EUR 7 711 -22,9%	EUR 7 496 -5,6%
Moderate scenario	What you might get back after costs Average return each year	EUR 10 229 2,3%	EUR 11 040 2,0%
Favourable scenario	What you might get back after costs Average return each year	EUR 11 972 19,7%	EUR 13 505 6,2%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

Please note that if the currency of the share class is different from the investor' local currency, fluctuations in the exchange rate between the two currencies will have an impact on gains or losses generated by the share class (upwards or downwards).

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario occurred for an investment between 03/2020 and 10/2022.

The Moderate scenario occurred for an investment between 03/2017 and 03/2022.

The Favourable scenario occurred for an investment between 12/2016 and 12/2021.
