

VARENNE VALEUR is a Sub-Fund of the Luxembourg based SICAV, Varenne UCITS.

Performance scenarios for each share class of the Sub-Fund are available in the Key Information Document (KID) of the share class and are updated on a monthly basis at [www.varennecapital.com](http://www.varennecapital.com). The scenarios are established in compliance with EU Regulation 1286/2014 (PRIIPS Regulation).

**What you will get from this product depends on future market performance.** Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions Markets could develop very differently in the future.

<b>Recommended holding period: 5 years</b>			
<b>Investment: EUR 10 000</b>			
<b>Scenarios</b>		<b>If you exit after</b>	
		<b>1 year</b>	<b>5 years</b>
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress scenario</b>	<b>What you might get back after costs</b> Average return each year	EUR 4 914 -50,9%	EUR 4 951 -13,1%
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b> Average return each year	EUR 8 366 -16,3%	EUR 8 366 -3,5%
<b>Moderate scenario</b>	<b>What you might get back after costs</b> Average return each year	EUR 10 347 3,5%	EUR 12 774 5,0%
<b>Favourable scenario</b>	<b>What you might get back after costs</b> Average return each year	EUR 13 047 30,5%	EUR 14 990 8,4%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

Please note that if the currency of the share class is different from the investor' local currency, fluctuations in the exchange rate between the two currencies will have an impact on gains or losses generated by the share class (upwards or downwards).

Varenne Valeur has been created on April 25, 2022, by the merger absorption of the French UCITS fund Varenne Valeur a ratio of 1 for 1. Data presented before April 25, 2022, are relative to the French UCITS and presented for information.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario occurred for an investment between 12/2021 and 12/2022.

The Moderate scenario occurred for an investment between 03/2018 and 03/2023.

The Favourable scenario occurred for an investment between 10/2016 and 10/2021.

		<b>1 year</b>	<b>5 years</b>
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress scenario</b>	<b>What you might get back after costs</b> Average return each year	GBP 4 917 -50,8%	GBP 4 941 -13,2%
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b> Average return each year	GBP 8 517 -14,8%	GBP 8 517 -3,2%
<b>Moderate scenario</b>	<b>What you might get back after costs</b> Average return each year	GBP 10 444 4,4%	GBP 13 440 6,1%
<b>Favourable scenario</b>	<b>What you might get back after costs</b> Average return each year	GBP 13 434 34,3%	GBP 15 812 9,6%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

Please note that if the currency of the share class is different from the investor' local currency, fluctuations in the exchange rate between the two currencies will have an impact on gains or losses generated by the share class (upwards or downwards).

Varenne Valeur has been created on April 25, 2022, by the merger absorption of the French UCITS fund Varenne Valeur a ratio of 1 for 1. Data presented before April 25, 2022, are relative to the French UCITS and presented for information.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario occurred for an investment between 12/2021 and 12/2022.

The Moderate scenario occurred for an investment between 08/2017 and 08/2022.

The Favourable scenario occurred for an investment between 10/2016 and 10/2021.
